

Lab 5: Ordered List, Tables, Images

Assuming that you got hired to a new company and inherited a website that was previously built by someone else. Your boss decided to make an upgrade (use your lab 4 to upgrade) on your website to spice things up a little bit. The following requirements are given to you.

1. Add another navigation to include an image. Pick South America if you like (see below). The image must be able to identify the coordinates. Pick three countries. When you click on that specific country, it would open the main website of that country.

2. Add this table to list all the budget of the department to one of your navigation (lab 4).
 - a. You may need to change the color on each category. Each row has an alternating color.
 - b. The header “Department Budget” should be centered.
 - c. Categories, Name, and Cost are centered and in bold type.

Department Budget		
Categories	Name	Cost
IT Department	Software Development	\$1.2
	Network Administrator	
	Desktop/Helpdesk	
Accounting Department	Inventory Tracker	\$300k

	Payroll Maintenance	
Others	Facility Maintenance	\$50k
	Landscape
